Highly motivated Computer Science and Data Science Engineering student with strong technical and analytical skills seeking an internship or entry-level position to apply my expertise in programming, data analysis and Machine Learning to solve real-world problems.

Educational Qualifications

ATME College of Engineering, Visvesvaraya Technological University Belagavi-590018, Mysuru

BE, Computer Science and Engineering Data Science, 8.60/10.00 (CGPA), 9.41/10(SGPA)

Karnataka, India

December 2021 - July 2025

GopalaSwamy Shishuvihara Independent PU College, Mysuru

Karnataka State Board Class - XII: 88%

Karnataka, India

2019 - 2021

Rotary High School Bannur, Mysuru

Karnataka State Board, Class - X: 87.16%

Karnataka, India

2018 - 2019

Work Experience

Machine Learning Intern in Anurva Advanced Techserve Pvt Ltd

November 2023 – December 2024

- Analysed large datasets to identify trends and patterns.
- Developed machine learning models to predict [specific outcomes].
- Collaborated with the team to implement data-driven solutions.

Artificial Intelligence Intern PLASMID

February 2024 – April 2024

- Developed and implemented machine learning models for classification and regression tasks.
- Cleaned and pre-processed large datasets to optimize model performance and Evaluated model performance using metrics like accuracy and F1-score.

Projects

MACHINE LEARNING PROJECTS

1.Face Emotion Detection System (Facial Emotion Detection using Har-cascade Classifier, CNN, Keras and Tensorflow)

- The project involves creating a system that can automatically recognize and classify human emotions from face expressions captured in images or videos using Machine Learning Models.

2.Raitha Mithra Web System (Single interactive webpage using ML and streamlit)

- This project provides a comprehensive decision-support system for farmers by integrating crop recommendations, yield and price predictions, and disease diagnostics into a single platform. By utilizing machine learning and real-time data, the system helps farmers make informed decisions about what crops to plant, anticipate yields, and maximize profits by understanding price trends.

3.Emotion Vista (Detect Emotions from both Facial expressions in images and vocal tones)

- The Emotion Vista is a project that provide real-time or post-processing emotional analysis using bars and waves to represent the intensity and variation of emotions detected.

IoT PROJECT

1.Smart Agriculture System (ESP32, DTH11 and Moisture Sensor)

- This system can measure temperature, humidity, and soil moisture levels, providing data that helps manage irrigation and climate control in real time. Here's a basic outline to get you started.

Skills

- Programming Languages:** C, Python, SQL.
- Software:** Power BI, Tableau.
- Relevant Skills:** Machine Learning, DBMS, DSA, Neural Network, CNN.
- Frameworks and Tools:** HTML, CSS, pandas, OpenCV, Streamlit.
- Programming Tools and IDEs:** Git, GitHub, VS Code, Jupyter Notebook, Spyder (Anaconda).
- Soft skills:** Confidence, Problem Solving, Logical & critical thinking, Time Management, Adaptable, Leadership, Communication, Hard Working, Quick learner.

Certificates

- Big Data Computing** (NPTEL - October 2023)
- Data Analytics with Python** (NPTEL - April 2024)
- Data Science** (SpreadTech Solutions - February 2024)
